

TMS

From route. To result.

Boltrics Transport Management System

Boltrics

boltrics.com

When transport needs to be faster, smarter, and more transparent.

The transport industry is constantly evolving. Customers demand real-time insight, tight delivery times, and maximum transparency. At the same time, costs are rising, workforce pressure is increasing, and planning tasks are becoming more complex.

In this evolution, technology plays a key role. Yet many logistics service providers still work with outdated tools or disconnected systems, leading to errors, inefficiencies, and frustration for both planners and customers. Is your TMS ready for today's and tomorrow's demands? Do you have control over costs, capacity, and communication — or are you constantly putting out fires?

The 3PL Industry IT Solution.

Boltrics offers an modular platform for WMS, TMS and FMS, built for logistic service providers. With an IT solution for modern transport management.

While most systems are based on traditional ERP solutions that find their origin in finance or manufacturing, Boltrics is 100% focused on Third Party Logistics. From small local companies to global multi-nationals: every workflow, every feature is designed with and for logistics service providers. Resulting in an IT solution tailored to your business.

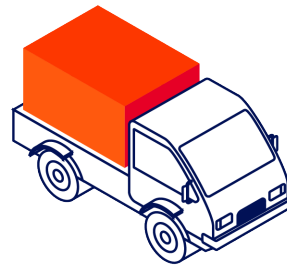

This leads to the Boltrics TMS, giving you control over your entire transport process. From order to invoicing. Plan routes efficiently, maintain control over your pricing agreements, and communicate easily with your drivers. Whether you manage groupage, dedicated transport, or intermodal shipments, Boltrics offers one application for all your processes.

From order to invoice.

- ✓ Order management
- ✓ Graphical route planning
- ✓ Driver app
- ✓ On-board computer
- ✓ Tracking & Tracing
- ✓ Resource Dispatcher
- ✓ Irregularities
- ✓ Contracts & rates
- ✓ Cross-docking
- ✓ Fleet management
- ✓ Customs
- ✓ Time registration
- ✓ Sustainability management
- ✓ Packaging registration
- ✓ APS integration

Fixed time. Fixed price.

No hourly billing, but a fixed price and a clearly defined timeline. That is how Boltrics implements software. Within a maximum of three months, your TMS is live, your key users are trained, and you hold the reins to optimize your processes.

Modular platform.

Boltrics' software platform is modular by design. That means you are never locked into the choices you make today. When your operation changes, your software adapts with you. You can easily activate new modules and workflows, or scale users up and down as needed. Through the Boltrics Marketplace, you benefit from preconfigured workflows and functionality based on best practices from more than 400 successful implementations. This way, your software grows with your logistics services, without the need to replace your entire IT solution.

Microsoft foundation.

Boltrics' TMS is built on Microsoft Dynamics 365 Business Central and fully hosted in the Microsoft Cloud. This means you automatically benefit from Microsoft's continuous innovations, including AI features such as Microsoft Copilot, seamless integrations with familiar tools like Outlook, Excel, and Teams, and predictive insights that make your operation smarter.

Start now. Expand later.

Full SaaS.

Thanks to the SaaS model, you are always up to date without the burden of IT maintenance. Microsoft provides automatic updates, maximum availability, and enterprise-level security. This allows your warehouse operation to work securely, flexibly, and future-proof.

Benefit from 3PL-specific functionalities. Always.

Graphical transport planning.

An overview of planning, resources, and costs in a single screen.

Centralized rates.

All contracts and pricing agreements at your fingertips.

Smart driver management.

Easily communicate via WhatsApp or on-board computers.

Operational efficiency.

Easily collaborate across different planning departments.
