Boltrics

The 3PL Industry IT Solution

“In the demanding world of 3PL, software is a game-changer for staying competitive. It can either drain your time and resources or seamlessly support your unique business processes. The choice is yours to embrace technology that empowers your operations and drives success.”

Jan-Cornell van Ekris
Managing Director Boltrics

Boltrics

The 3PL Industry Solution.

Boltrics is not a generic software company that merely targets logistics. We are logistics.

We offer a modular platform for WMS, TMS, and FMS, specifically for logistics service providers.

While other systems are derived from finance or manufacturing, Boltrics is 100% focused on Third Party Logistics (3PL). Every workflow, every screen, every feature, designed with and for 3PL providers.

We do not deliver custom-built solutions. Thanks to proven best practices specifically tailored to the industry, you don't need custom-built. And that's exactly why you always stay up to date, don't have to maintain an on-premise system, and can keep pace with the speed of the industry.

Every innovation we implement is instantly available to all our customers. That's the power of the collective - with more than 400 logistics companies worldwide.

WMS

TMS

FMS

Boltrics

Our software.

Warehouse Management (WMS)

Streamline your warehouse activities from A to Z. Easily manage receipts, inventory, and shipments. From scanning to integrations, and from Value Added Logistics to warehouse strategies. All warehouse processes under one roof.

Transport Management (TMS)

One system supporting all your transport activities, from order to cash. Efficiently create routes with the visual plan screen, select resources, and communicate with drivers en route. Our software leads the way.

Freight Forwarding Management (FMS)

A complete software solution for handling air freight, ocean freight, and road transport. Gain control over all sections, events, and milestones along the way. Integrate with (air)ports and share real-time information with customers while minimizing manual actions. Take your operation to new heights.

Boltrics

Our software’s modular structure

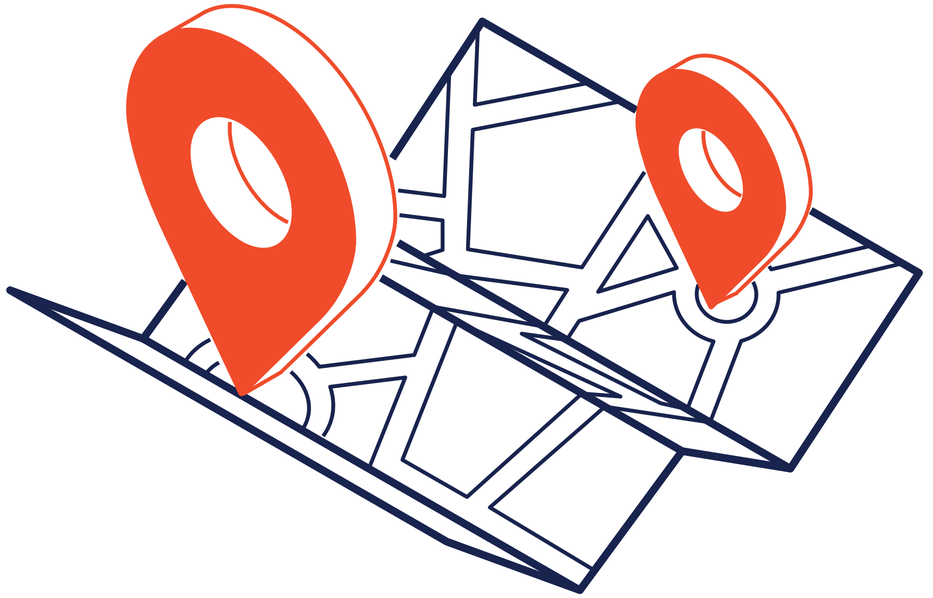
allows for customizing the solution to your company's needs and scaling user capacity and modules according to ongoing business requirements. Whether handling rapid growth or addressing temporary fluctuations, the platform guarantees dynamic scalability to meet changing demands.

Boltrics

Think globally. Act locally.

Boltrics aims to change the way logistics service providers operate around the world. But we can't do it alone. We've partnered with local resellers who implement our industry-specific software solution in your country.

Same software. Same philosophy.
Closer to your business.



Boltrics

Future-proof your IT.

Utilize the powerful Microsoft ecosystem

Our logistics software solution is built on the trusted Microsoft Dynamics 365 Business Central platform, continuously providing the latest technological advancements for your industry-specific processes. From AI to integrating with other Microsoft applications.

Make cyber security a non-issue

Since the software is fully hosted by Microsoft (SaaS), you don't have to worry about cyber security, server updates, or application availability. Microsoft handles all of that, allowing you to focus on your core business: logistics.

Embrace the Era of AI

AI is here to stay. Leverage Microsoft's advancements in Copilot and OpenAI platforms to enhance employee experiences, transform customer engagement, and revolutionize business processes. Boost your productivity and step into the future.
