Your opportunity

From Complexity to Control.

Logistics service providers (LSPs) are ready to modernize, but many are still held back by fragmented systems, manual workarounds and industry-specific processes that standard ERP cannot fully support. With Boltrics you can turn this complexity into a growth opportunity. By combining local market knowledge with a proven logistics vertical, you can offer customers a solution that brings control, efficiency and sustainable growth.

Your profile

Different starting points. Same opportunity.

For Microsoft partners

You already know the platform. Now add the vertical.

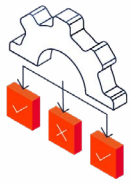

- Leverage your existing Business Central expertise.
- Add a proven logistics vertical without building it yourself.
- Faster time to value with proven processes en workflows.
- Differentiate in the market and win new customers.

For logistics IT partners

You already know the industry. Now add a scalable platform.

- Use your deep sector and process knowledge.
- Replace or complement existing or generic solutions.
- Offer a future-proof and secure Microsoft-based platform.
- Scale your expertise and serve new customers.

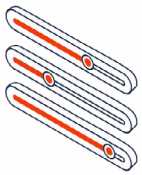

The benefits

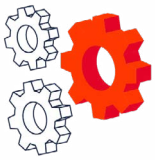

End-to-end logistics software

One modular platform for 3PLs

Configuration without development

Always up-to-date

Boltrics enables your consultants to configure complete logistics processes without the need for custom development. The result? Faster implementations, predictable outcomes and faster time to value for your 3PL customers.

The Boltrics solution

One platform powering logistics service providers.

Boltrics is a global industry-specific solution for warehousing (WMS), transportation (TMS) and freight forwarding (FMS). Built on Microsoft Dynamics 365 Business Central and powered by a single code base, it delivers proven logistics functionality that can be configured to customer needs, without the need for custom development.

Boltrics

The business case

A profitable and scalable partner business.

40%

starting partner margin on monthly revenue.

Build a profitable business model with attractive margins, recurring revenue and long-term growth potential.

Recurring software revenue.

Create a predictable and scalable income stream as your customers grow.

Implementation and services revenue.

Deliver value through implementation, integration and advisory services.

Continuous growth of the solution and the market.

As LSPs expand, so does your revenue, across multiple sites and modules.

For more than 12 years, we have successfully combined Boltrics' logistics platform with our industry expertise, implementation experience and complementary services. Together, we can create more value for customers, expand our offering and continue building deeper logistics expertise.
